

CORGPAPER

\$Corgi on Filecoin

The first memecoin on FIL

What's Corgi ?

A lot of people ask, what is Corgi and filecoin? \$Corgi is the first memecoin on file network and the mascot of filecoin, Because filecoin is a new network and not many people know about it, we are trying to introduce corgi in filecoin to everyone including platforms in the crypto world.

**This project pays
homage to filecoin, and responds to the popular demand
for dog-based narratives in the crypto space. Corgi was
fairlaunched on filecoin.**

CORGI VISION

Corgi represents more than just a memecoin. As many of you in crypto may already know, memecoins tend to outperform nearly all other assets in the crypto market.

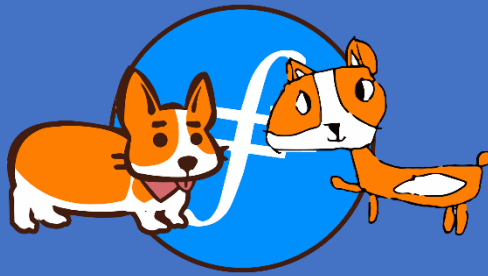

Simultaneously, they are often criticized for being perceived as valueless assets.

However, this statement is far from the truth, as memecoins serve as a bridge for everyday consumers and institutions to participate in the crypto market in a fun and engaging way, thereby increasing overall demand for various types of cryptocurrencies across different sectors.

Corgi's vision extends beyond being a memecoin; it aims to serve as a gateway to attract more consumers, institutions, and alternative chain enthusiasts into the Filecoin ecosystem, thereby boosting on-chain activity & growth. This manifests in various aspects such as, but not limited to Enhancing the overall community view of memecoins and fostering on-chain community growth.

- Increasing TVL (Total Value Locked) on Filecoin**
- Increasing the usage of charting tools and decentralized exchanges (DEX) such as Sushiswap, Dexscreener, Dextools, Ave.ai**
- Positively influencing the movement of the \$FIL token's price In the end, attracting more people means raising awareness and education about the ecosystem.**

With education being the key to achieving mass adoption in the crypto space, Corgi provides immense value to Filecoin by fostering a fun and safe environment for users to participate and learn.

UTILITY CORGI

Despite being a memecoin, \$CORGI strikes a perfect balance between fun & usefulness, through the construction of useful products, tools, and services for the Filecoin ecosystem investor.

These utilities provide opportunities for \$CORGI to produce passive revenue streams.

- BuyBot

Recognizing a significant gap in the Filecoin ecosystem, particularly on the widely-used social app Telegram, "CORGIBOT" was created to address this issue.

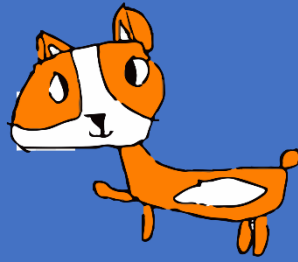

Many multi-chain whales, institutions, and consumers rely on Telegram for building communities and trading cryptocurrencies, yet there is a current lack of exposure to features such as the famous "BuyBot" and an easily accessible "Trending" sector — CORGIBOT steps in to solve this problem.

We will create Fil's first comprehensive & public BuyBot, accessible to anyone on Telegram with a filecoin-native project.

Using our BuyBot enables cross-pollination and partnership opportunities whilst simultaneously providing the ability to attain "CORGI Trending", a channel highlighting the hottest Filecoin projects at any given time. This feature provides free exposure to Filecoin projects for whales, institutions, and consumers.

- Corgiswap

Since we currently trade only on sushiswap, corgi will build a decentralized exchange (or DEX) which is a peer-to-peer marketplace where transactions occur directly between crypto traders in filecoin.
